# Brain Umbrella - One System for HR, Pay & Bill, ROTA and Payroll

Brain is an advanced cloud software that puts you in complete control of your Umbrella Payroll Business. Don't let the baggage of old software or a non-accommodating provider hold you back on your dreams of taking your business to new heights.

Brain Umbrella is designed ground up with Umbrella contractors, recruitment agencies, and payroll processors in mind. Fully automates and integrates key processes like placement, scheduling, rota, timesheet, attendance, rates, invoice, billing, payroll, HR, and many more!

Every legislation, every process gets managed within a single application, this eliminates the need for operating multiple different systems and the tedious exports and imports of sheets from one system to another. Also, there are no data synchronisation issues. Whether it is a change of bank account details or change in rates everything is instantly reflected. Every stakeholder has access to their own portal providing them direct access to what matters to them the most.

Time to bring forward the plans of upgrading to a modern cloud-based software and get your business all set for the growth in the new year.
